

SUJIT KUMAR PANIGRAHI

Software Developer | Full-Stack & Mobile Application Developer

sujitkumar8283h@gmail.com | Bhubaneswar, Odisha, India | linkedin.com/in/sujit-kumar-ab24a3281 | github.com/sujit7064

PROFESSIONAL SUMMARY

Results-driven Full-Stack Software Developer with 1+ year of professional experience building scalable web and cross-platform mobile applications. Proficient in PHP (Laravel, Yii), React.js, React Native, Angular, and AWS Lambda. Demonstrated ability to deliver end-to-end solutions across healthcare, agri-tech, retail, fintech, and government sectors. Adept at designing RESTful APIs, integrating third-party services, and collaborating within agile teams to ship production-ready products.

PROFESSIONAL EXPERIENCE

Junior Software Developer | Kytics Technology

Bhubaneswar, Odisha • July 2024 – Present

- Develop and maintain scalable web applications using PHP frameworks (Laravel and Yii) serving multiple enterprise clients.
- Design and integrate RESTful APIs enabling seamless communication between front-end and back-end systems.
- Build responsive front-end interfaces using React.js, improving user experience across desktop and mobile devices.
- Create cross-platform mobile applications using React Native, delivering modern solutions for Android and iOS clients.

KEY PROJECTS

Pride of Cows (POC) – Sales Application | Onsite, Mumbai

- Developed the complete customer-facing sales application for Pride of Cows (premium dairy brand) during an onsite engagement in Mumbai.
- Built the front-end sales portal using React.js with responsive design, enabling seamless product browsing, ordering, and subscription management.
- Designed and deployed serverless backend APIs using AWS Lambda, improving scalability and reducing infrastructure overhead.
- Developed the admin and operations front-end panel using Angular for managing orders, inventory, and customer data.
- Integrated payment gateways and automated order tracking workflows to streamline the end-to-end sales pipeline.

Crypto MLM Platform

- Built a full-featured cryptocurrency Multi-Level Marketing (MLM) platform handling referral networks, commission calculations, and wallet management.
- Developed robust backend RESTful APIs using Laravel to manage user hierarchies, transaction records, and earnings distribution logic.
- Built the admin dashboard and operations panel using Angular, providing real-time analytics, user management, and MLM tree visualization.
- Developed the customer-facing web application using React.js, enabling users to track referrals, earnings, and portfolio performance.
- Implemented secure authentication, role-based access control, and encrypted transaction handling for compliance and data integrity.

Grievance Management System – Kandhmal MP Constituency

- Developed a government-sector grievance redressal platform for the Kandhmal MP constituency enabling citizens to log, track, and resolve complaints digitally.
- Built the citizen-facing portal using React.js where users can register, submit complaints, and track real-time status and resolution history.

- Implemented a volunteer module allowing field volunteers to register new citizens and submit complaints on their behalf, bridging the digital divide.
- Developed backend APIs using Laravel to manage complaint workflows, assignment routing, escalation rules, and reporting dashboards.
- Created the admin panel using Angular for MP office staff to monitor grievances, assign tasks to volunteers, and generate constituency-level reports.
- Integrated notification systems (push/email/SMS) to keep complainants informed at every stage of the grievance lifecycle.

Farmlancer – Agri-Tech Marketplace

- Developed a web and mobile platform enabling farmers to sell products directly to consumers, eliminating middlemen and improving farmer income.
- Built backend services using Laravel and Yii, designing APIs for order management, payment processing, and product listing workflows.
- Developed the cross-platform mobile application using React Native and the front-end UI using React.js with fully responsive design.

Techtricks – Healthcare Services Platform

- Contributed as a full-stack developer to a comprehensive healthcare platform offering home nurse bookings, doctor appointments, ambulance requests, and medicine delivery.
- Built backend APIs using Laravel for user management, booking coordination, and multi-service scheduling.
- Developed patient-facing web interfaces and admin dashboards using React.js, and contributed to the React Native mobile application.
- Integrated Google Maps API for location-based services, payment gateways, and real-time push/email notifications.

SmartMart Billing & Inventory Management System

- Built a comprehensive billing and inventory management solution for retail marts using the Yii framework with barcode scanning integration.
- Implemented modules for product inventory management including item creation, stock updates, dispatch tracking, and restocking alerts.
- Designed real-time dashboard analytics, monthly sales reports, daily transaction summaries, audit trails, and role-based multi-user access control.

TECHNICAL SKILLS

Back-End

PHP Laravel	PHP Yii	REST API Design	AWS Lambda
-------------	---------	-----------------	------------

Front-End & Mobile

React.js	React Native	Angular	JavaScript
----------	--------------	---------	------------

Database & Tools

MySQL	HTML5 & CSS3	AJAX	Git
-------	--------------	------	-----

Cloud & Integrations

AWS Lambda	Google Maps API	Payment Gateways	Push Notifications
------------	-----------------	------------------	--------------------

EDUCATION

Master of Computer Science (MCA)

ITER, SOA University, Bhubaneswar | Nov 2022 – Apr 2024

Bachelor of Science in Physics

F.M. University | Sept 2019 – Aug 2022

LANGUAGES

English • Hindi • Odia
